Your developer for professional media technology  
products and tailormade solutions

**Mechanical SOLUTIONS**

**Display SOLUTIONS**

**Interactive SOLUTIONS**

**Electronic SOLUTIONS**

**Playout SOLUTIONS**

## Mechanical SOLUTIONS

In media installations, technologies for mounts, fixings and adjustments often play an essential role. The deep knowledge of professional presentation technology and access to many of the products make it possible to create the right mechanical part for individual projects. In addition to standard products, we also offer customer-specific solutions for various types of installations.

### TITAN

easy to use lifter for large displays and LED single units

### Installation

LED stacking & hanging

### Mounting

individual mounting systems for LED and displays

### Wall Mounts

and adapter brackets

## Mechanical SOLUTIONS

EXACT solutions has decades of experience in building mechanical accessories for projectors. As a result, we developed the EVO frame series and the EVO-LINK series. It combines precision, design, robustness and flexibility with price efficiency. Furthermore, working with ultra short throw lenses has never been easier, thanks to tool-less removing of the upper part of the EVO frames.

**EVO-LINK-201**

EVO-LINK-200 series

**FRAME-EVO-P20**

without projector

shown with standard lens

**Frame-EVO-P20**

shown with removed upper part and ultra short throw lens

## Display SOLUTIONS

The focus here is on special viewing experiences. Our product development team creates solutions out of innovative and promising technologies to serve in impressive fix installations, at trade fairs or events. With the new transparent Ghost-OLED product line, this is entirely fulfilled. Ghost-OLED Full Kit is a stand-alone solution, that is also suitable for rental and staging. The Ghost-OLED Half Kit is designed for fixed installations. Both versions are compatible with the Touch Kit that transforms the Ghost-OLED into a touch screen, whenever needed.

### **Ghost-OLED**

transparent OLED

### **2FaceFoil**

switchable between  
transparent & non-transparent

### **Display Coating**

anti-glare & protection

## Interactive SOLUTIONS

Media installations with touch functions are omnipresent. Here, the type of interactive technology is the key parameter, which is decisive for purposeful and intuitive use. Beside standard products, we offer a wide range of customised interactive solutions. primeTOUCH curved, the only curved touch system for large video walls or primeTOUCH No-Y, suitable for interactive rooms, as well as capacitive touch foils from our fluxTOUCH range are available for your projects.

### fluxTOUCH gen3

based on PCAP technology

### TOR

Tangible Object Recognition

### primeTOUCH flat

based on flat IR technology

### radarTOUCH

based on IR laser technology

## Electronic SOLUTIONS

Special electronic equipment can lead to the optimisation of whole operations. Deep expert knowledge, experience and a practical approach lead to the development of professional customised tools for testing, control, operation and communication.

**unicornBOX**

test pattern generator

**Tally Adapter &  
Breakout Box**

**Fibercheck 880**

optical fiber testing

**EC-50  
Slot-in PC gen2**

## Playout SOLUTIONS

High-performance playout systems enable perfect presentations. Whatever software tool you want to use, EXACT solutions helps you develop the right server. Due to a broad market overview and technology experience we are able to choose the right periphery behind the HMS servers to bring the signals to all destinations.

### HMS

high performance  
media server

### HMS mini

high performance  
media server mini

[VENTUZ]

coolux  
MEDIA SYSTEMS

### Software

possible playout software
